NEPA Task Force Web Site Reports a New Feedback Entry:

Name: Barbara Crayton

Email Address: crayton@sprynet.com

Comments: I do not think the government should pay private businesses to cut timber with public funds. Then allow the private businessmen to make a profit selling the lumber. If our tax money is used to cut timber then the government should get the money back when the timber is sold. I think the "Bush plan" that he called a partnership is nothing but a fancy way to give federal \$ to private businessmen but lets not call it government assistance.
